

Declaration According to Regulation (EU) 2019/1021 (POP)

Persistent organic pollutants, such as pesticides and some industry chemicals, which can be transported across international boundaries far from their sources and persist in the environment, bio-accumulate through the food web, pose a risk to human health and the environment.

The continuous release of POPs into the environment have been seriously concerned by European Union since Regulation (EC) No 850/2004 of the European Parliament and of the Council on POPs entered into force in 2004.

After amended several times and for further amendments, the POPs regulation was recast into Regulation (EU) 2019/1021 of the European Parliament and of the Council in 2019.

Freedom Electronics Ltd , as a supplier of electronic components, is aware of its responsibility to protect the environment and human health. We have always kept on tracking the update of prohibited substances and restricted substances listed in the POPs Regulation and verify the presence of any substance in our products.

Based on the information we verified, we announce, to our best knowledge, our products are in compliance with the POP's Regulation and don't intentionally use substances subject to prohibitions, restriction, release reduction and waste management listed in Annex I, II, III & IV in Regulation (EU) 2019/1021. We continue to follow up on the POPs regulations update and ensure our products' conformity.

Signed for and on behalf of Freedom Electronic Ltd:

Rory Gavin
